Posizione

Role Value Proposition:

As part of the Global ICT Architecture CIO within the General Manager area, GCC Transversal Solutions is responsible, coherently with the Holding Company competent functions guidelines, for:

- delivering global API integration solutions out of multi-country programs (e.g. PSD2-related initiatives, open banking, Salesforce integration)
- managing first and second level support for PSD2 and Open Banking requests
- acting as entry point for CIOs as accountable of development, management and maintenance of transversal integration capabilities and supporting Platforms, such as API Gateway and ESB
- establishing industrialized processes to manage the evolution and maintenance of developed assets
- supporting the CIOs to converge towards a Service Oriented Architecture while ensuring a strong governance on the service catalog.

Key Tasks and Responsibilities:
We are currently looking for a highly motivated application developer in the API ecosystem to join our team.
The API Developer mainly manages the maintenance of services by:
- Troubleshooting incidents as a result of issues reported by API consumers
- Improving existing services/solutions through code optimization and tests following DevOps methodologies
- Supporting the maintenance release processes, and providing production operational support on deployments
- Following the whole application lifecycle including infrastructural upgrades

Carrying out the application asset management including compliancy with security specifications, cartography, service catalogue and other company processes
